

# Teaming up for hepatitis C management

You are not alone—more than three million Americans are diagnosed with hepatitis C. There are major advances in the care and treatment of hepatitis C, including medication that may provide a cure for you.

## Our program is designed for you

The Hepatitis C Care Management Program connects your care team and your nephrologist to support you throughout your treatments. And if you fill your prescriptions with FreseniusRx, you will also have the support of a FreseniusRx pharmacist, available 24/7 at 1-800-801-1496 to answer your questions.

## Comprehensive pharmacy care

We tailor your kidney medication management program and monitor your hepatitis C treatment along with other medications.

## Insurance support

Enrolled in FreseniusRx? FreseniusRx pharmacists can help you understand your benefit options, including co-pays, prior authorization and coverage.

## Prescriptions made easy

You can choose any pharmacy that is convenient for you and change at any time. If you choose FreseniusRx, the pharmacy can deliver prescriptions to your home or dialysis center.\*

*\*Dialysis center delivery not available in every state.*

New treatment options may lead to a cure

3 tablets per day  
for 8 weeks

OR

1 tablet per day  
for 12 weeks

## GET STARTED TODAY—TIMING IS EVERYTHING

A cure is possible in as few as eight to twelve weeks. With our Hepatitis C Care Management Program, your care team provides personalized, comprehensive care throughout your treatment. Talk to your care team today.
