

Your life. Your health. Your care.

Get connected and thrive with PatientHub.

Tracking your treatment data and trends can help you make healthier choices and thrive on dialysis. With PatientHub, you and your care team can easily check your progress and stay connected in between your monthly visits.

PatientHub can help you stay active in managing your care.

Submit flowsheets electronically

Submit your daily flowsheets on your computer, tablet or smartphone. Your data will be automatically sent to your care team for review.

Exchange secure messages with your care team

Connect and communicate with your care team from home with secure messaging through PatientHub.

Access lab results and see trends

Access your lab results and trends so you can be empowered with the information you need, where and when you need it.

View historical health data

Take control of your health and see how your historical health and treatment data, including vitals, have changed over time.

View medications

Access information about each of your medications, including the name of your medication, your prescribed dosage and how to take your medication.

Order and track supplies

Access your order history, submit your supply order and check your delivery status. You can also sign up to receive email and/or text notifications about your order.

Access the online community

Ask questions, share stories and learn more from others sharing similar experiences with kidney disease through the Kidney Care Community.

START TAKING CONTROL OF YOUR HEALTH TODAY.

Talk to your home therapies nurse to get started using PatientHub.
